

RiskStormingOnline

MODERATION

Quality has become a team responsibility, but there rarely is a wholesome, actionable plan to achieve it.

Different roles often do their own pieces of quality improvement activities and are done with it.

RiskStorming breaks those patterns.

Quality is not a checklist. It's a journey which begins and ends with the team.

It's a journey we're all on together. So let's figure out where we're going, what the possible threats might be and who will take on which responsibilities.

By taking part in a RiskStormingOnline session, you'll achieve a common understanding on how to deliver quality as a team and **you'll learn how to run your own workshop of RiskStormingOnline.**

FOR WHO?

- Teams trying to build in Quality from the start
- Teams who need facilitated discussions with stakeholders on Quality
- Teams who are starting out on a new product or Feature
- Teams who are not used to dealing with Risks

KEY TAKE AWAYS:

- Prioritise quality aspects in terms of progression.
- Identify risks and learn how to define them
- Define practices to prevent, mitigate risks or plan contingency plans
- Plan out different activities by different roles to increase quality

A screenshot of the RiskStormingOnline interface. It displays a grid of quality aspects and risk cards. On the left, there are two main category cards: "USER FRIENDLINESS QUALITY ASPECTS" (blue) and "ADAPTABILITY QUALITY ASPECTS" (blue). The main area contains several smaller cards: "risk #1: Clumsy, no flow. Unclear. People give up. Our users abandon our feature." (yellow), "A/B TESTING TECHNIQUES" (green), "FLUENCY PATTERNS" (orange), "risk #2: Too progressive, people are biased against this technology, especially trusting it with their bodies. Low user adoption." (yellow), "COMPARABLE PRODUCTS HEURISTICS" (pink), "PERSONAS TECHNIQUES" (green), "risk #1: Too many different devices Can't test everything Errors in devices we don't know about" (yellow), "AUTOMATION PATTERNS" (orange), "SAMPLING TECHNIQUES" (green), and "risk #2: Not up to date devices incompatibility with the AR Frustration and" (yellow). At the bottom left, there is a "PHASE 2" button.

RiskStormingOnline

BENEFITS FOR YOUR ORGANISATION

- Center a team around delivering Quality
- Dispel misunderstandings on priority, quality aspects and risks
- Uncover unidentified risks
- Strategise early on how to avoid, mitigate and/or deal with risks

YOUR CONTACT: BEREN VAN DAELE

Beren has travelled Europe delivering more than 50 RiskStorming workshops in classrooms.

With the heavy focus on distributed teams and remote working, he has now digitalised the workshop into a collaboration tool and runs at least weekly sessions with different partners.
